Martela

A smart and easy way to care for the environment

Stricter environmental requirements mean furniture recycling takes more time and know-how, and is also surprisingly expensive due to the waste disposal charges. With Martela's comprehensive services you can recycle responsibly and easily, also saving money and your valuable time.

COMPREHENSIVE SERVICE ENSURES GOOD RESULTS

To ensure your peace of mind, Martela takes care of your recycling planning, collection of furniture and other items for recycling, and all necessary further measures, including recycling reporting. We will take care of all the work in the agreed time, giving you the freedom to do your work.

LIFECYCLE APPROACH RIGHT FROM THE START

The aim of our system, which is in compliance with the ISO 14001 environmental standard in Finland and Sweden, is to minimise the furniture's adverse environmental impact. Recycling is already part of the development of new products, and under the lifecycle approach the aim is to design products that have as long a life as possible. We favour renewable materials and we take recycling into account in the technical structure of our products.

MARTELA OUTLET: A NEW HOME FOR YOUR FURNITURE

Furniture in the best condition will be sold in the nearest of our Martela Outlet stores. Furniture items to be reconditioned, such as office chairs, will be serviced and reupholstered.

ALMOST ALL MATERIALS CAN BE REUSED

Furniture that is unfit for use will be dismantled and the components sorted into wood, metal and plastic materials. The materials will then be utilised either as parts for used furniture, as secondary raw materials or in energy production. Only a fraction of the furniture components will end up in a landfill.

ADVANTAGES:

- Clear pricing
- Service includes everything necessary
- You avoid high waste-disposal charges
- Reduced costs of furniture storage
- Positive impact on your company's image
