

SALMIAKKI GROUP WORK TABLE – DESIGN IIRO VILJANEN NOW AVAILABLE

The designer Iiro Viljanen studied the way kids tend to interact in today's schools. Increasingly, students do things together in small groups, either reading, playing, chatting etc. and less on their own in the classroom. Also it became clear that learning situations change during lesson which demands regrouping of the chairs and tables.

The Salmiakki table is a result of these observations. It is extremely versatile due to its geometry, it is possible to form groups, rows and semi-circular formations according to the pedagogic needs. Up to 4 students can sit around a single Salmiakki table, for playing a game together or just to socialize.

The Salmiakki table is an excellent solution for education environments which require easy and quick regrouping, available with castor legs. The rounded edges are safe and comfortable, and the shape works well together with the Martela Triangle table as well.

Iiro Viljanen

The 1967 born, widely acknowledged designer Iiro Viljanen graduated as an architect from Lahti University of Applied Sciences in 1991 and as an interior design architect from Helsinki University of Arts and Design in 2000. Iiro has been a part of the Martela designer team since 1999. Many products within the Martela catalogue have originated from his pen, like the MyBox table, Largo sofa and easy chair and the James task chair.
